LUMINOUS COFFEE AND SIDE TABLES

## AICCI® T3 / AICCI® T4

---

A magnificent example of skilful Finnish design and craftsmanship. A perfect table and luminaire combination that complement any room and adorn any home.

The high level of light ambiance of the AICCI® T3 and AICCI® T4 derives from the interaction of two qualities; the ability of the highest grade turned Finnish birch plywood to filter and reflect light aesthetically and AICCI®'s unique innovation of using state of art LED light optics, with control, integral to the furniture design to achieve a natural effect.

As we are all individual our vision is unique and, since equally so, are our lifestyles and preferences widely diverse, the tables have adaptive light. A table that is also an adaptable luminaire could enhance mood and be beneficial in so many ways to our human psyche.

The collection comes in 5 sizes, to allow you to arrange your comfort zone to live the way your feel and desire.

## AICCI T3® DISTINCTIVE TABLES

In the AICCI® T3 layers of thin natural, heritage of birch wood are arranged in a table frame and on luminous top surface. This gives the AICCI® T3 a warm Nordic touch and provides a distinctive lighting experience.

The AICCI® T3 features are our most advanced innovations, offered together for maximum sensation of comfort.

The wood we use is grown in Finland. Extremely harsh winters produce wood that has an attractive pale appearance when harvested in winter. This is the birch used to make each AICCI® luminous wooden table. The result is a unique concord that is both constructed to produce and deliver light sensitively and to be functional as a table – with each table unique, distinctive and individual as a piece of furniture, due to the naturally occurring variation in the wood's texture.

## AICCI® T3 / AICCI® T4 SUPERIOR EXPERIENCE

WHEN TECHNICAL INNOVATION MEETS  
SMART USER-FRIENDLY DESIGN, THE RESULT  
IS UNPARALLELED COMFORT

With the widely tunable white LED lights, you can modify the light on your tables to match the style and mood you want. Tunable white describes the variable colour temperature, the light from warm white to cool white light. By achieving the right colour temperature and light intensity, artificial lighting can contribute to human well-being. This kind of high-quality lighting benefits above all people who do not have the opportunity to go outdoors daily and spend enough time in the natural light.

Plug & play connection for AICCI® tables allows for simple placement of tables anywhere indoors; while the built-in Casambi-based advanced lighting control turns on and off the light and changes the colour temperature and light intensity, as well as other variable modern functions.

The AICCI® T3 and AICCI® T4 uses state-of-the-art LEDs for guarantee high light intensity, long service life and superior quality light. Tables' Casambi lighting control is based on Bluetooth (BLE) technology. This provides all the options you would expect from an advanced high spec lighting control system to the best standard required, that are also trusted by professionals.

In addition, AICCI® tables are designed and manufactured in accordance with the principles of sustainable development. For this reason, your table structure is designed to be opened and to be accessible to the servicing or replacement of lighting components through time and use.

## AICCI® T4 COMFORTING TABLE

AICCI® T4 is the perfect side table for your living and bedroom. Its round shape and pleasant light provides a sense of security by creating a cosy, sympathetic environment.

In the bedroom, the AICCI® T4 is a combination of the sturdy nightstand and versatile, controllable lighting fixture. This combination provides optimal daily comfort, keeps items that are important to you at your fingertips, as well as delivering the lighting that suits every situation.

The table has a round light area on both sides of the tabletop, allowing bi-directional light, and a shelf at the bottom. The planes are connected to each other by light-capturing, solid birch rods. The AICCI® T4 dynamic bidirectional light adapts to changing needs – and tones – while maintaining a comforting familiarity. Only 43 cm / 16.9" wide, the table reserves a small footprint in your room, being a suitable option for even the smallest spaces. Equipped with plug-in, it is easy to move and deploy.
