

AICCI LuminousWood

Illuminating wood claddings and panels

- ▲ Illuminating wood claddings and panels for wall, suspended ceiling, and furniture, as well as soundproofing partition wall element that can be illuminating either from one or both sides.
- ▲ Natural wood surface and pleasantly illuminating light panel that supports well-being
- ▲ As transilluminated wood filters the light beautifully and brings out the grain patterns of real wood impressively. By adjusting the colour temperature of the light, you can emphasize the wood's own shade or change it flexibly.
- ▲ Surface options include genuine wood veneers of the light tones, as birch, spruce, pine, aspen, maple, linden and ash.
- ▲ Maximum size 1200x3000 mm, minimum thickness 12 mm.
Available shaped into different shapes and flame retardant treated.
- ▲ Installation with mounting system, magnets or screws
- ▲ White 2700K, 4000K, 6500K or 2000-6500K LEDs
- ▲ Lighting control on/off, dimming, Casambi, DALI or DMX
- ▲ The panel structure can be opened and serviced
- ▲ Made in Muurame, Finland by AICCI.
- ▲ Design from Finland and Finnish Key Flag certified
