AICCI T1  
TABLES

AICCI T1 is designed as a lamp and table for living and sleeping areas where a feeling of sanctuary and comfort is desired. We wanted to design a table with a superior form of ambient lighting that beautifully illuminates the whole area of the table, the space around it and even the carpet or flooring below.

Päivi Charpentier and Sauli Koukkari

AICCI T1 is a practical Nordic design lamp and table that plays with beautiful shades and qualities of light and blends to create an ambient atmosphere in the room with simple elegance and adaptable lighting.

Coffee and side table family T1 has glass top rectangular and square tables of different sizes and heights. The two smallest side tables are also available as a wall table.

Luminous tables bring a vivid element to the space and enchants with its minimalistic beauty. A unique tunable two-way light suits each preference.

You can tune white 2000-6500K or coloured light by a built-in Casambi lighting control. This Bluetooth controller is operated on your Android or iPhone devices with the Casambi App, as well as with switches.
